

"I really wouldn't be where I am today without the support of Alice** [Aberlour support worker] and Aberlour. I wouldn't have known where to begin. By talking to Alice about my experience it is helping me to deal with it and move on. Now I am more confident, I am looking forward to the future and building a safe stable environment for my children."

Kerrie

**Supporting families
to build a better future**

The Bridges Partnership

The Bridges Partnership is jointly provided by Aberlour Family Support Service - Glasgow and Shelter Scotland. The service is a multi-agency partnership designed to support mothers and their children living in the North West and South Glasgow area who are or have been affected by domestic abuse.

Our children & family workers are trauma informed, IDAA qualified (Independent Domestic Abuse Advocates) and trained in the Safe & Together Model.

Referrals are accepted from a wide range of partners including the NHS, education and statutory services. We also accept self-referrals from families who need our help.

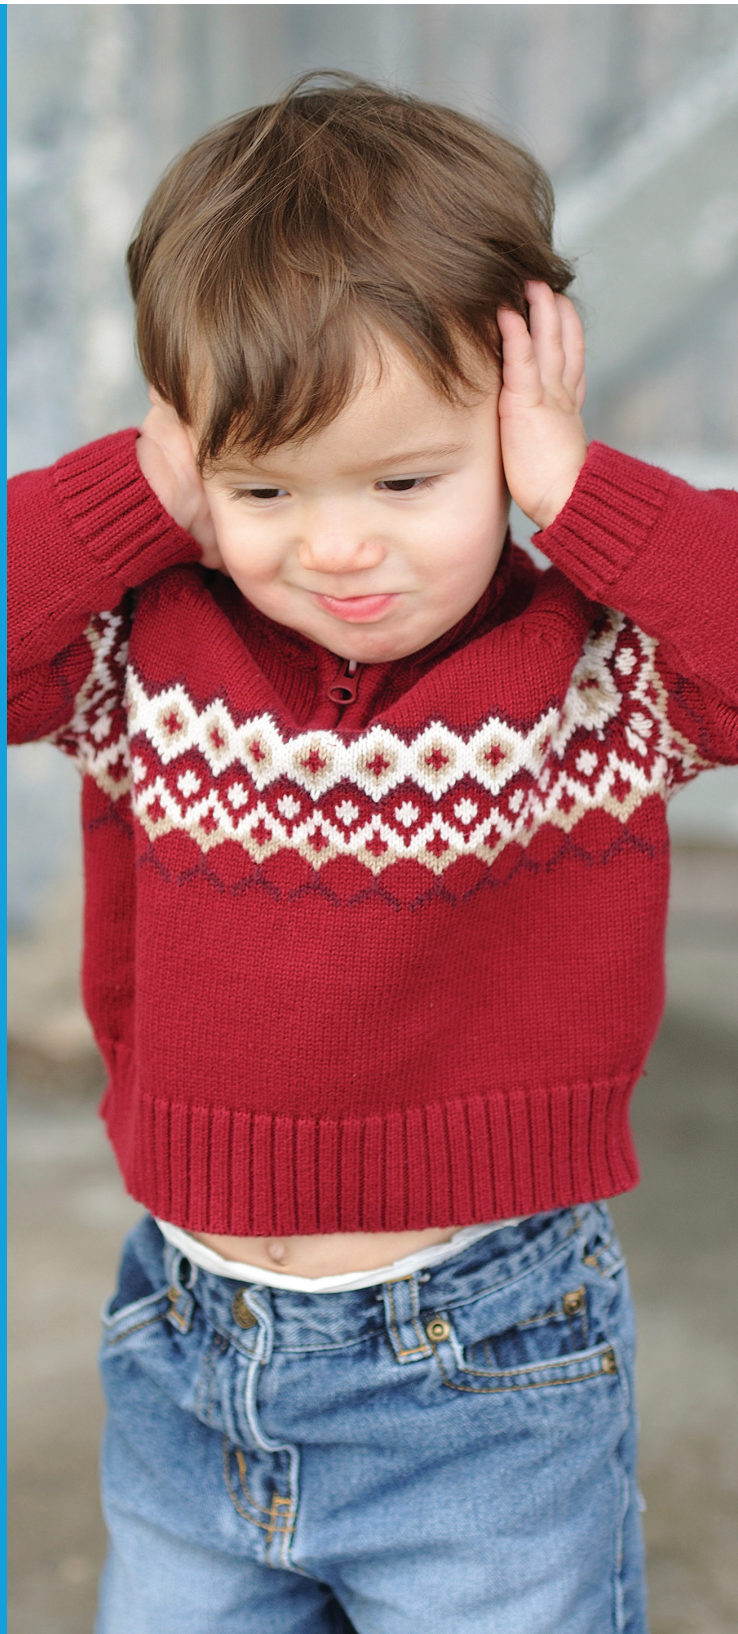

Who do we support?

We help mothers and their children affected by domestic abuse living in the North West and South of Glasgow.

Are you or someone you know:

- a pregnant woman affected by domestic abuse?
- a mother with children
 - affected by domestic abuse living in the family home?
 - fleeing domestic abuse?
 - who has experienced domestic abuse and is now living in a safer environment?

Then get in touch as our team can help.

How can we help?

We will work with mothers and their children to:

- Assess and manage risk
- Provide housing information & assistance
- Inform women & children of their rights
- Advocate for the family
- Provide 1-2-1 support for both mother and children as appropriate

We will do this by:

- Keeping safety planning & risk assessments a priority
- Providing continuous support until each mother & their children feel safe
- Signposting & helping each mother to access additional services as needed
- Providing support & advice on criminal and civil proceedings
- Working within GIRFEC's model
